

When purchasing DVK Vanity, consider the look of your other bathroom fixtures. Remember that you will get better understanding and better deals when you visit DVK Showroom, and that the real key is to creating a bathroom you love is to use a combination of materials and accessories to create a style all your own.

A vanity provides a focal point for your bathroom, offering function and a way to express your decorating style. DVK Bathroom Vanities come in a variety of configurations, including single sink, double sink, different number of doors or drawer. When selecting a vanity, keep the following questions in mind:

- What material is the best fit for your bathroom?
- Are you looking for an assembled vanity, or do you want to match the base and top yourself?
- How high would you like the vanity top to be? (Unless you're putting it in a bathroom used primarily by younger children, consider a vanity height of around 34 inches.)
- How much storage do you need?
- How much space is available?
